Dr. Hudak and her legal counsel, Matt Cates, were present virtually during the Board’s consideration of the matter. Dr. Hudak provided the Board with a summary of her current work and experience.

Board staff provided a summary of the case. The complainant is the daughter of patient T.R. and alleges that Dr. Hudak failed to recognize how ill her father was when he was seen in the office for multiple symptoms that had lasted several days. The patient had a significant medical history and was taking several medications. There was no documentation of labs being ordered or some of the symptoms being addressed by Dr. Hudak.

Dr. Hudak stated she was not able to obtain all required tests due to patient dehydration and that the lab was closed for the weekend. Dr. Hudak also stated that even if she was able to obtain what was required for those certain tests they would not have known the outcome until after the weekend and the patient went to the emergency room before the weekend was over. Dr. Hudak did agree that there were some things she should have done differently including documenting her intent and thought process in the records. Dr. Hudak stated that she did instruct the patient to go to the ER should his symptoms continue or worsen. Dr. Hudak further stated that she has made improvements to her processes to ensure that this does not happen again.

Upon hearing the summary of the case and review of the provided materials, the Board made a motion to issue a Non-Disciplinary Letter of Concern citing A.R.S. § 32-1854 (6), (21) & (39)

Dr. Huish was present virtually during the Board’s consideration of the matter. Dr. Huish provided a summary of his school and work experience.

Board staff provided a summary of the case. The malpractice case alleges an improper vacuum assisted delivery resulting in birth defects. The Outside Medical Consultant who reviewed this case for the Board felt that Dr. Huish may have fallen below the standard of care during the 1st stage of labor when fetal heart rate D cells persisted and immediate action was not taken.

Dr. Huish evaluated the patient and let the patient know that they needed to deliver quickly because of the D cells. Dr. Huish states that he obtained verbal consent from the patient to use a vacuum due to the seriousness of the situation and a c-section was already being performed on

another patient so the operating room was not available as an option at the time for his patient. The patient was able to deliver the baby and was passed off the baby for continued care. Dr. Huish provided a detailed explanation of the care of the patients.

The Board stated that it appears that Dr. Huish handled the patient’s care as appropriate based on the circumstances. Upon hearing the summary of the case and review of the provided materials, the Board made a motion to dismiss the case.

The patient went to see Dr. Hancock for back and shoulder pain and had also advised of an intentional 30 pound weight loss. Labs were done and some levels were elevated. It was also noted they did speak to the patient's wife about the symptoms and new labs continued to show elevations and abnormalities.

Dr. Hancock stated when he met with the patient, the patient advised him that he would run, play pickle ball and was active and was losing weight because of his activity. Dr. Hancock advised the Board that this patient was not very compliant with keeping his appointments but finally came back in to see the Physician Assistant.
